**Supplementary Table 3:** Correlations and 95% confidence intervals for percentage accuracy scores for WM, APM and CAB-I with both self-report and online measures of self-confidence for young (n = 153) and older adults (n = 91).

	<u>Self-report Self-confidence</u>			<u>Online Self-confidence</u>	
	<u>PEI</u>	<u>TROSCI</u>	<u>Word Meanings</u>	<u>APM</u>	<u>CAB-I</u>
<u>Young Adults</u>					
<u>WM % correct</u>	.02 [-.14, .18]	.12 [-.04, .28]	.71 [.62, .78]	.10 [-.06, .26]	.21 [.05, .36]
<u>APM % correct</u>	.13 [-.02, .29]	.20 [.05, .35]	.12 [-.04, .27]	.68 [.58, .75]	.43 [.29, .55]
<u>CAB-I % correct</u>	-.02 [-.18, .14]	.07 [-.10, .23]	.28 [.12, .42]	.44 [.30, .56]	.76 [.68, .82]
<u>Older Adults</u>					
<u>WM % correct</u>	.00 [-.20, .21]	-.02 [-.23, .19]	.79 [.69, .85]	.26 [.06, .44]	.30 [.08, .49]
<u>APM % correct</u>	.02 [-.18, .23]	-.09 [-.29, .12]	.11 [-.10, .31]	.45 [.27, .60]	.38 [.17, .56]
<u>CAB-I % correct</u>	-.11 [-.33, .12]	-.25 [-.45, -.03]	.10 [-.13, .31]	.13 [-.10, .34]	.80 [.70, .87]
